EDUCATION

Bachelor of Technology, Computer Engineering,
Sharif University of Technology
<https://www.sharif.ir/en/>

COURSES

Artificial Intelligence and reinforcement Learning
Network Security
System Analysis and Design
IT Project Management
Database Design
Operating System

LANGUAGES

English C2

Spanish B2

Persian B2

HOBBIES

Reading, Playing and Watching Football, Movies, Writing

PROFILE

Motivated Bachelor's student in Computer Engineering with a strong foundation in "Artificial Intelligence, Network Security, and Applied Mathematics", seeking an opportunity to apply analytical and technical skills in a real-world setting. Eager to contribute to innovative projects while further developing expertise in AI algorithms, cybersecurity principles, and mathematical problem-solving. Passionate about leveraging computational theory and practical engineering to drive efficient solutions.

PROJECTS

Smart Home Automation System, Object Oriented System Design, Individual Project
Designed a modular prototype for a smart home system (Lights , thermostat, security and many more appliances)using OOP principles (abstraction , encapsulation) in Python.
Focus on documentations and design: Created detailed UML diagrams to model system architecture, user interactions and scalability.
Tools and Skills : UML (PlantUML / Lucid chart), OOP , Python ,Technical Writing.

Memory Management Unit Simulation, Operating Systems : Individual Project
Simulated a hardware MMU in Python to translate the virtual addresses to physical addresses using Paging and Segmentation. Implemented page table structures, analyzed performance trade offs.

Railway Ticket Reservation System, Database design , Group Project
Designed and implemented a normalized relational database (SQL) for a train ticket booking system.

TECHNICAL SKILLS

Scrum Methodologies	
UML design	
Python	
C++	
Object Oriented Programming	

SOFT SKILLS

Communication
Technical Documentation and team Presentation

Collaboration
Team Projects and Peer code Reviews

Problem-Solving
Debugging complex systems , Algorithm Optimization

Time Management

Leadership and Adaptability
